EDUCATION

BS Computer Science
In progress — 2nd Semester

SKILLS

Languages

HTML5, CSS3, JavaScript, PHP, Python, C++

Frameworks & Libraries

React, Node.js, Express.js, Laravel, Tailwind CSS

Tools & Platforms

Git, GitHub, MySQL, XAMPP, Google Gemini API

ACHIEVEMENTS

- Recommended (REC) for Pakistan Military Academy (PMA) Long Course 155
- Selected to compete in Chitral's first AI Hackathon with a self-built AI student-assistant platform

PROFESSIONAL SUMMARY

Full-stack developer working across the MERN stack and Laravel, currently a Computer Science student building toward a career in AI. Comfortable turning an idea into a working, end-to-end product — from database and API design through to a polished frontend — and currently applying that to an AI-powered student assistant platform for Chitral's first AI hackathon.

EXPERIENCE

Full-Stack Web Application Developer — Intern

HindukushSoft Technologies | 2-month internship

- Built CRUD applications and REST APIs end-to-end using Laravel and React
- Worked across the full stack: migrations, models, controllers, routes, Blade views, and validation
- Implemented authentication flows (login/registration) and protected routes

PROJECTS

Student AI Assistant Platform

Laravel · React · MySQL · Google Gemini API

One-platform AI study tool combining a notes/PDF/image-to-quiz generator, an interactive timed test mode with AI-explained answers, an exam-prep flow, and a career-guidance chatbot — built as the entry for Chitral's first AI hackathon.

HindukushSoft Internship Tasks

Laravel · React

CRUD applications and REST API tasks completed over a 2-month internship.

Online Education Website

HTML · CSS · JavaScript

A full education-platform site build.

Amazon UI Clone

HTML · CSS

Pixel-matched clone of the Amazon desktop interface.

50 Projects in HTML, CSS & JS

HTML · CSS · JavaScript

A growing set of small front-end builds, one experiment at a time.

Web Projects

HTML · CSS · JavaScript

A collection of standalone web builds.
